

**What is Radon?** Radon is a naturally occurring radioactive gas produced by the breakdown of thorium & uranium in soil & rock.

**Dangers of Radon Exposure**  
According to the [American Lung Association](#) **21,000 people a year die of radon-induced lung cancer!** Radon is the leading cause of lung cancer for non-smokers and the second leading cause of lung cancer in the general population.

**What Can You Do About Radon?**  
First have your home tested as soon as possible to find out what the Radon level is in your home.

If your homes level of **Radon** is greater than 4.0 pCi/L or greater, Mitigation is recommended.

Contact the Kalina Companies to have a State of Ohio Licensed, AARST Certified **Radon** Specialist review the best mitigation system for your home.
